

Response to Reviewers

Questions (Q) and answers (A) for reviewer

1. Q: **Language Quality: Grade B (Minor language polishing).**

A: According to the valuable suggestions from the reviewer, we have made the manuscript edited by native English speakers at “editage” and the certification is attached in the e-mail.

2. Q: **it is desirable to have a image during the surgery.**

A: Thank you very much for your valuable suggestion. We also really want to include surgical images or video in the article, but unfortunately, we did not use a USB flash drive to save the surgical video due to a malfunction in the imaging system.

3. Q: **Review of literature is also short. the authors must discuss the published cases of sciatic nerve variations in the pelvic region and relate it to the current finding.**

A: Thank you very much for your valuable suggestions. We supplement latest cutting-edge researches, which discuss the diagnosis and treatment of sciatic nerve schwannoma in the pelvic region. The added contents are highlighted with yellow color in the revised manuscript.
