Name of Journal: *World Journal of Stomatology*

ESPS Manuscript NO: 22528

Manuscript Type: REVIEW

11 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) Reviewer no 00742412: This is an interesting topic and well written. I have no concerns about this manuscript.

Answer 1: Thanks reviewers' for his/her valuable time for reviewing the manuscript.

(2) Reviewer no 00742421: Need to compare with others and make some comments in discussion section.

Answer 2: Thank reviewer for his/her valuable comments. In accordance with the comment we have added some comments and comparisons in discussion section. While the paper was re-reading, some unconnected parts of the paragraphs were found. When passing on to the next subjects, new ideas and forgotten remarks had added to the manuscript.

(3) 00742372: There is lot of repetition. The length of manuscript can be reduced. It seems suitable for publication after minor modifications.

Answer 3: Thanks reviewer for his/her valuable comments. In our review, we actually tried not to analyze in detail. By dividing the topics into two parts as 1) effects of drinks to tooth structures and 2) restorative materials, we urged not to confuse such complex topics. As the paper was divided into two parts, same manners could draw the attention twice.

Because of this reason, whole paragraphs had re-read and attempted to minimize the repetitions in accordance with the comment.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Stomatology*.

Sincerely yours,

Ugur Erdemir, PhD, DDS
