**First Reviewer:** *"Interesting datas Iran has a low incidence of CRC need to be confirm in other Iran facilities"*

- We would like to express our appreciation for your attention and your thorough understanding for need such as these studies. Thanks for spending the time to read this paper and found it interesting.

**Second Reviewer:** *"Manuscript #02939921 Authors report in this paper the detection rate of colonoscopy for cancer and adenoma in an Iranian population. Minor comments: Title: "pathological future"...I believe it was "..Features" Abstract: "All data will be extracted from a cross-sectional study and retrospectively assessed the colonoscopy database." This sentence is not clear and needs to be*

*rephrased (same problem with the similar sentence in “study design”)*

- We would like to thank you for your attention and insightful comments. They gave us clear guidance and some positive critiques. Based on your comments all spelling, grammatical sentences and mistake expression were corrected.

Actually, your believe about “..Features” in the title completely correct, and I don’t know how it became “Future” I think is spelling mistake. By the way thank you for your attention and notice it. We correct it.

Also we corrected this sentence “*All data will be extracted from a cross-sectional study and retrospectively assessed the colonoscopy database*” and rephrased it in abstract and study design.

**The text was revised and tried to make it more functional.**

Thank you again for publishing our manuscript in the *World Journal of Gastrointestinal Pathophysiology*

**Sincerely yours,**
