	General Information of the Manuscript	
	Name of journal: World Journal of Gastrointestinal Endoscopy	
	Manuscript NO.: 90208	
	Column: Retrospective Cohort Study	
	Title: Long-term outcomes after endoscopic removal of malignant	
1	colorectal polyps: results from a 10-year cohort	
1	Authors: Anna Fábián, Renáta Bor, Béla Vasas, Mónika Szűcs, Tibor	[Y]
	Tóth, Zsófia Bősze, Kata Judit Szántó, Péter Bacsur, Anita Bálint,	
	Bernadett Farkas, Klaudia Farkas, Ágnes Milassin, Mariann Rutka,	
	Tamás Resál, Tamás Molnár and Zoltán Szepes	
	<b>Reviewer code:</b> 03479449, and 06079050	
	First decision: 2023-12-27 18:01	
	Editorial Office's Comments	[Y]
	Science Editor: Remind Revision at 2024-01-08 08:21	
	Company Editor-in-Chief: I recommend the manuscript to be	
	published in the World Journal of Gastrointestinal	
2	Endoscopy. When revising the manuscript, it is recommended	
	that the author supplement and improve the highlights of the latest	
	cutting-edge research results, thereby further improving the content	
	of the manuscript. To this end, authors are advised to apply	
	PubMed, or a new tool, the RCA, of which data source is PubMed.	
	RCA is a unique artificial intelligence system for citation index	

	evaluation of medical science and life science literature. In it, upon	
	obtaining search results from the keywords entered by the author,	
	"Impact Index Per Article" under "Ranked by" should be selected to	
	find the latest highlight articles, which can then be used to further	
	improve an article under preparation/peer-review/revision. Please	
	visit our RCA database for more information at:	
	https://www.referencecitationanalysis.com/, or visit PubMed at:	
	https://pubmed.ncbi.nlm.nih.gov/.	
3	The fixed headings are copied.	[Y]
	The title will concisely summarize the main topic of the study,	[Y]
	being not overly long (no more than 18 words). Words such as	
4	'exploration', 'research', 'analysis', 'observation', and 'investigation'	
	are to be avoided. The title should not start with 'A', 'An', or 'The'	
	and will not include any Arabic numbers or abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	[Y]
6	names are listed on the title page and are consistent with those	
	listed in the signed Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	[Y]
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	have read and approve the final manuscript."	

	The 'Supported by' statement describes the source(s) of financial	[Y]
8	support and includes the corresponding identification number(s)	
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	[Y]
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	
	The Manuscript Tracking information (i.e., Received, Peer review	[Y]
10	started, First decision, Revised, Accepted, Article in press, and	
10	Published online) are provided along with the corresponding editor	
	and date for each item, and contain no spelling errors.	
	The Abstract section is formatted according to the article-specific	[Y]
	style (structured vs unstructured) and word count thresholds, as	
	follows:	
	Editorial, Frontier, Medical Ethics, Minireview, Review:	
	Non-structured abstract that is no more than 200 words.	
	Field of Vision, and Letter to the Editor: Non-structured abstract	
	that is no more than 150 words.	
11	Research articles: Structured abstract with subsections for	
	BACKGROUND (no more than 100 words); AIM (no more than 20	
	words); METHODS (no more than 80 words); RESULTS (no more	
	than 120 words); and CONCLUSION (no more than 26 words).	
	Case Reports: Structured abstract with subsections for	
	BACKGROUND (no more than 80 words); CASE SUMMARY (no	
	more than 150 words); and CONCLUSION (no more than 20	
	words).	
	The 'Key words list' will provide 5-10 keywords that reflect the	[Y]
12	main content of the study. Please do not use abbreviations for the	
	keywords (e.g. ulcerative colitis, not UC). The first letter of each	

13       The "citation" contains authors' names and manuscript title. The name of the first author should be typed in bold letters; the family (sur) name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials.       [Y]         13       For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Fom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of gastric cancer: A meta-analysis. World J Castroenterol 2024; In press         14       The Core tip is a short paragraph that is independent of the content of the Abstract. The 'Core tip' will provide a summary of the study that outlines the most innovative and important arguments. This section should be less than 100 words.       [Y]         14       The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations given upon first appearance in the text and the abbreviation gresented in parentheses [ <i>i.e.</i> , "computed tomography (CI)"]. First-person pronouns ( <i>e.g.</i> , ", 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.       [Y]         16       The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the       [Y]			
13       The "citation" contains authors' names and manuscript title. The name of the first author should be typed in bold letters; the family (sur) name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials.       IY         13       For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Fom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. The 'MATERIALS AND METHODS' section clearly and accurately [Y] describes all materials and methods used to obtain the data		"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
described in the text to highlight the innovations related to the current study, the information is presented carefully.         The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data		'we') are used appropriately to clearly indicate the work performed	
current study, the information is presented carefully.         The 'MATERIALS AND METHODS' section clearly and accurately         16         describes all materials and methods used to obtain the data		by the author(s). When weaknesses of previous studies are

presented in the article and is adequate for a reader to repeat the	16	describes all materials and methods used to obtain the data	
		presented in the article and is adequate for a reader to repeat the	

	study.	
	The 'RESULTS' section concisely describes the observational and	[Y]
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is	
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed	[Y]
	as ${}^{a}P < 0.05$ , ${}^{b}P < 0.01$ ( $P > 0.05$ usually does not need to be denoted).	
18	If there are other series of <i>P</i> values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	
	and a third series of <i>P</i> values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$ .	
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.	
	The 'DISCUSSION' section (1) describes the main purpose and	[Y]
	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
19	the data) and draws conclusions or inferences based on the results;	
19	(4) points out the limitations of the study and their impact on the	
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
20	individuals or organizations for technical support (i.e., providing	
	instrumentation, equipment or experimental materials, and/or	[ NI ]
	assistance in experimental work), non-technical services (i.e., useful	[N]
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for	[Y]
21	original articles in accordance with the specified format. If the	

	manuscript is an original study (Clinical Study or Basic Study),	
	Evidence-Based Medicine, Meta-Analysis, or Systemic Review, the	
	"ARTICLE HIGHLIGHTS" section is required.	
	The 'REFERENCES' section lists the references in the Vancouver	[Y]
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name ( <i>i.e.</i> , "Pang <i>et al</i> "). For	
	citations where no author is indicated, a superscript number should	
22	be placed at the end of the sentence. Respective examples are: " $Ma^{[1]}$	
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high	
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	( <i>e.g.</i> , Pan <i>et al</i> <sup>[2-5]</sup> , please see reference [8]).	
	References have been edited by Auto-Analyser. Journal references	[Y]
	have been verified to ensure that there are no duplicate references	
	and that the PMID numbers are correct. For references not yet	
	included in PubMed: the name of Chinese journals is spelled out	
23	using Chinese Pinyin, with the first letter of each word capitalized	
	(e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other	
	languages are listed according to indexing information retrieved	
	from Google. Book references are presented with all the information	
	relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as	[Y]
	follows:	
24	<u>Commentary:</u> no less than 50;	
	<u>Review:</u> no less than 100;	
	<u>Article:</u> no less than 30/26;	

	Case Report and Letter to the Editor: no less than 1.	
	The ethics-related statements are provided in accordance with the	[Y]
25	manuscript type (e.g., Manuscript NoInstitutional review board	
	statement, Manuscript NoAnimal care and use statement, etc.).	
	The names of the peer reviewers and the scientific editor are present	[Y]
26	at the end of the paper ( <i>e.g.</i> , P-Reviewer: Hugot D S-Editor: Wang JL	
	L-Editor: P-Editor:).	
	The order and numerical labeling of tables and figures is consistent	[Y]
	with their appearance and presentation in the text. Symbols in	
	tables (e.g., +, -, ×, $\div$ , *) correctly correspond to the definitions in the	
27	footnotes. Only one legend is provided for each multi-panel figure	
27	consisting of color graphs, black and white graphs, or line graphs	
	that depicts data of the same theme. For example: Figure 1	
	Pathological changes in atrophic gastritis tissue before and after	
	treatment. A:; B:; C:; D:; E:; F:	
	The original figure documents have been provided. The figures	[Y]
	have been arranged using PowerPoint to ensure that all graphs or	
28	arrows or text portions can be reprocessed. Split pictures include	
	flow charts, line graphs, histograms, and graphs including text.	
	Unsplit pictures include meta-analysis diagrams, PCR amplification	
	curves, and survival curves.	
	Standard three-line tables have been provided, that is, only the top	[Y]
	line, bottom line, and column line are displayed, while other table	
29	lines are hidden. The contents of each cell in the table should	
	conform to the editing specifications, and the lines of each row or	
	column of the table should be aligned.	

30	The author(s) highlighted the changes made to the manuscript	[Y]
	according to the peer-reviewers' comments.	
31	The responses to the peer-reviewers' comments are consistent with	[Y]
01	the changes made to the manuscript.	
	A CrossCheck investigation (an effective tool for detecting unoriginal	[Y]
	content, enabling our editors to preserve the journal's integrity and	
	the authors' copyright) has been performed for the manuscript via	
	the website: <u>http://www.ithenticate.com/</u> . The results document	
	contains the following information for the manuscript: "Name of	
32	journal", "Manuscript No.", "Columns", "Title" and "Author list".	
	The Figure of the CrossCheck results is saved in PNG format (.png)	
	at 1440 × 680 pixel resolution. The PDF of the $CrossCheck$ results has	
	been saved under the file name: manuscript No CrossCheck report	
	(e.g., 870-CrossCheck report). The Google searches have also been	
	performed to further ensure publication of original content.	
	The revised manuscript is provided (file name: Manuscript	[Y]
	NoReview; e.g., 870- Review).	
33	The letter of peer-reviewers' comments is provided (file name:	
00	Manuscript NoPeer-review(s); <i>e.g.</i> , 870-Peer-review(s)).	
	The response letter is provided (file name: Manuscript	
	NoAnswering reviewers; e.g., 870-Answering reviewers).	
	The related ethics and relevant documents are provided, such as (1)	[Y]
34	Approved grant application form(s) or funding agency copy of any	
	approval document(s) (file name: Manuscript NoGrant application	
	form(s)); (2) Biostatistics review certificate (file name: Manuscript	
	NoBiostatistics statement); (3) Conflict-of-interest statement (file	
	name: Manuscript NoConflict-of-interest statement); (4) Clinical	
	trial registration statement (file name: Manuscript NoClinical trial	
	registration statement); (5) Institutional review board approval form	
	or document (file name: Manuscript NoInstitutional review board	

	statement); (6) Institutional animal care and use committee	
	approval form or document (file name: Manuscript	
	NoInstitutional animal care and use committee statement), and (7)	
	Signed informed consent form(s) or document(s) (file name:	
	Manuscript NoInformed consent statement).	
	All authors signed the Copyright license agreement form (file name:	[Y]
35	Manuscript NoCopyright license agreement; e.g., 870-Copyright	
	license agreement).	
	The language certificate provided by authors who are non-native	[Y]
36	speakers of English meets the requirements (file name: Manuscript	
	NoLanguage certificate; e.g., 870-Language certificate).	
	The photos licensed in the Agreement for Use of Personal Photos	[Y]
37	are consistent with those in the paper (file name: Manuscript	
37	NoAgreement for use of personal photos; e.g., 870-Agreement for	
	use of personal photos).	
38	The Editor has sent the edited manuscript to authors for	[Y]
50	proofreading.	
	This document (Checklist of Responsibilities for Scientific Editors)	[Y]
38	has been saved under the file name: manuscript NoScientific	
	editor work list (e.g., 870-Scientific editor work list).	
40	The text of the manuscript is typed in Book Antiqua font, 12 pt, with	[Y]
40	1.5 line spacing.	
	The primary responsibilities of our scientific editors include careful	ly editing and
	checking the entire manuscript and all accompanying materials for	:: (1) complete
Responsibilities	and comprehensive revision of the manuscript according to t	he reviewers'
of scientific	comments; (2) accuracy and authenticity of all ethical related docum	ents; (3) errors
editors	in spelling, grammar, punctuation and wording; (4) format of each section in the	
	manuscript; (5) suitability of tables, figures, figure data and legends; (6) accurate	
	and appropriate presentation of symbols (e.g. +, -, $\times$ , $\div$ , %, *) in table	es and figures.

Scientific editors are responsible for sending the edited manuscript to authors for
proofreading.
