

ANSWERING REVIEWERS

April 22, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: Manuscript_20140314233205-revised.doc).

Title: IgG4-Related Disease Manifesting as an Acute Gastric-Pericardial Fistula

Author: James Frydman, Shahar Grunner, & Yoram Kluger

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 10137

The manuscript has been improved according to the suggestions of reviewer 535896 and journal editor:

1. Changes have been made to coincide with WJG format.
2. The abstract has been lengthened and core tip inserted.
3. Discussion has been expanded to be more instructive to the treating physician, including general information, epidemiology and diagnostic criteria. Given its increased recognition as a clinical entity, it is important diagnosis to include in the differential diagnosis where appropriate.
4. Case comments have been provided.
5. Revisions highlighted in yellow with updating of reference list.

Of note, I am an American national residing in Israel and English is my first language.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

James D. Frydman, MD FACS
