Language Editing

To who it may concern:

The manuscript entitled "***Should temporary extracorporeal continuous portal diversion replace meso/porta-caval shunts in "small-for-size" syndrome in pigs?***" has been edited by a PhD-level scientist with a native English speaking background provided by DuoEase scientific writing services. All the information in the edited manuscript remains true to the authors' original work.

Sincerely yours

Signed: Shine Xiang Dated: 30th June 2014
