

July 20, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 11053-edited.doc).

**Title: Outcomes for jejunal interposition reconstruction compared with Roux-en-Y anastomosis procedures: A meta-analysis**

**Author:** Kai-Xi Fan, Zhong-Fa Xu, Mei-Rong Wang, , Dao-Tang Li, Xiang-Shan Yang, Jing Guo

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 11053

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) We totally agree with the reviewer's suggestion. Our paper will be improved if we could add some literatures written in other language, such as Russian, Korean and Japanese. However, there are hundreds of languages in the world, it is impossible to search all the publications in any language. A large quantity of meta-analysis paper only included literatures written in English. In our paper, we included literatures written in Chinese or English, which is an acceptable search strategy to perform a meta-analysis.

(2) In page10, line3 we changed the "in operative time", to "incidence of reflux esophagitis".

(3) we mentioned all the affiliations of the author in the paper.

(4) I changed "Zherlov" to "Zhedov" in Table1.

(5) we added the title and figure number obviously on tables and figures.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Central Laboratory, Third Department of Medicine, Affiliated Hospital of Shandong Academy of Medical Sciences, No. 38, Wuyingshan Road, Jinan 250031, Shandong Province, China. fankkxx@126.com
