

Sub: Resubmission with Edits: Submission for Review Article: NF- κ B's Role in Inflammation Associated
Gastrointestinal Malignancies

Dear Editor,

Please find enclosed an original article for your consideration for Review Article. This is novel article that highlight NF- κ B's Role in Inflammation Associated Gastrointestinal Malignancies. This article will assist scientists and readers to design new pathways and treatment modalities in gastrointestinal cancer

I have included changes as recommended by the reviewers.

Reviewer 1

- 1) Language and punctuation really need a careful check, the manuscript in this form cannot be published. Apologies for the errors in first draft. Thank you and we have done necessary edits.
 - 2) Please choose one acronym solely for the word interleukin (either IL or I) and use it throughout the text, as it is now is a bit confounding.
- We appreciate your input and have made changes.

Reviewer 2

- 1) It should be started by a good introduction, followed by describing NF- κ B pathways and their role in inflammation and cancer from the mechanistic point of view.
- Finally, regional specific role of NF- κ B in cancer/inflammation (e.g. NF- κ B in esophageal, stomach, colon cancer, etc.) should be discussed.

Thank you for a very useful suggestion and we have incorporated the suggestions

- 2) The article should be closed by a conclusion and future direction.
- We have included the above suggestion. Once again your advice was very helpful in making the article useful.

Thank you
