

ANSWERING REVIEWERS

October 28, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 12489-Edited.doc).

Title: Immune profiling and cancer post transplantation

Author: Christopher M Hope

Name of Journal: *World Journal of Nephrology*

ESPS Manuscript NO: 12489

The manuscript has been improved according to the suggestions of reviewers:

1. Reviewer 00723046;

The conclusion has been altered slightly to entail insight into what thoughts the review is trying to invoke.

It is noted that the review does in-fact have over 200 references. However, we feel that the review covers more than a typical review would;

What is the problem? (cancer incidences)

why? - over immunosuppression, types of immunosuppression, and other risk factors.

who? - cell types effect and how to measure them

What to do now? - studies showing reduction in primary prevention reduces cancer incidence

Significance? - Identifying KTR that potentially can have immunosuppression reductions as form of secondary prevention.

2. Reviewer

We thank the reviewer for analysing this article.

3 Format and References have been updated

Correct structure of in text citations

PMID and DOI added to bibliography

Thank you again for publishing our manuscript in the *World Journal of Nephrology*.

Sincerely yours,

A handwritten signature in black ink, appearing to be 'C Hope', written over a horizontal line.
