

MANUSCRIPT ESPS NO. 13858

## **Role of diet as a link between oxidative stress and liver diseases.**

**Dear Editor,**

I really appreciate your interest in my manuscript and I guarantee that the language of my manuscript reached Grade A.

The same English teacher revised 2 recently published papers of mine on your journal entitled:

- [Hepatitis B vaccine by intradermal route in non responder patients: an update.](#)

Filippelli M, Lionetti E, Gennaro A, Lanzafame A, Arrigo T, Salpietro C, La Rosa M, **Leonardi S.** **World J Gastroenterol.** 2014 Aug 14;20(30):10383-94

- [\*\*Helicobacter pylori infection and atopic diseases: is there a relationship? A systematic review and meta-analysis \(ESPS Manuscript NO: 11655\)\*\*](#)

Elena Lionetti, **Salvatore Leonardi**, Angela Lanzafame, Maria Teresa Garozzo, Martina Filippelli, Stefania Tomarchio, Viviana Ferrara, Carmelo Salpietro, Alfredo Pulvirenti, Ruggiero Francavilla, Carlo Catassi

**World J Gastroenterol.** 2014 (in press)

In both manuscripts your Editorial Office considered English language very good (Grade A).

Now I hope even this last paper n. 13858 will be suitable for the publication.

Sincerely yours,

Prof. Salvatore Leonardi
