Anticataractogenic effect of hesperidin in galactose-induced cataractogenesis in Wistar rats

Ramar Manikandan, Arumugam Munuswamy

Quantitative data were reported as mean  $\pm$  SD and the statistical significance of observed differences between the values of different groups were determined by Student's *t*-test where  $P < 0.001$  and  $P < 0.05$  were regarded as statistically significant. The statistical treatments were affirmed by a biomedical statistician.

  
R. Manikandan
