Confirmation Letter for Statistical Review

I'm a person with doctoral degree in Biostatistics. I have experiences in the design, analysis and interpretation of biomedical data. I reviewed the manuscript entitled "MRI of the Pancreas in Streptozotocin-Induced Diabetic Rats: Gadofluorine P and Gd-DOTA" in terms of the study design, statistical method and interpretation. The limitation of this manuscript is the small sample size which caused lack of power, but the applied statistical methods were proper, and the results were presented in proper manners.

Sincerely yours,

Choi, Yunhee, PhD
