Dear Editor,

I have revised the manuscript "The contribution of the IL-17/IL-23 axis to the pathogenesis of Inflammatory Bowel Disease" by Cristina-Sorina Cătană, Ioana Berindan Neagoe, Vasile Cozma, Cristian Magdaş, Flaviu Tăbăran and Dan Lucian Dumitraşcu from the Iuliu Hatieganu University of Medicine and Pharmacy, submitted for publication to your prestigious journal **World Journal of Gastroenterology**, and I guarantee that the level of the English language in this manuscript meets the international standards.

I mention that I am a native English speaker, originally from Edinburgh, Scotland, established in Romania for the past 20 years. I am currently English language editor for 6 medical journals published entirely in English.

Sally Wood-Lamont
