Dear Editor,

Please find enclosed the edited manuscript in Word format (file name:15148-review.doc).

Title: Arpin contributes to bacterial translocation and development of severe acute pancreatitis

Author: Deng WS, Zhang J, Ju H, Zheng HM, Wang J, Wang S, Zhang DL

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 15148

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) This experiment is a series, some problems haven't finished. In the future study, I'll clinical result statistics. In this article I mainly speak a point in time Arpin and bacterial translocation, intestinal mucosa and TJ to the role of the protein.

(2) Prognosis of patients with acute pancreatitis has too many factor influences. In our study arpin expression and the prognosis of patients has no obvious relationship, this may be associated with clinical data have Uniqueness, but the bacteria translocation had a great influence on the prognosis of patients. About ARPIN relationship with the prognosis of patients need more clinical data.

(3) Discussion of the essay I added the arpin may cause of the molecular basis of bacterial translocation.

(4) In our study, When I design is that all of the patients receiving endoscopic check, however, patients with SPA, appearing only clinically the have a colonoscopy treatment indications such as abdominal distension. So those who have not colonoscopy SAP patients, I didn't included in the experiments.

(5) " In table 1, the column of SAP and row corresponding to age. The states there were 31 males and 17 females", this is a error. I was correct it, thanks.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Deng wen-sheng
