We have added reference 2 in the place according to the suggestion. And we also cut the discussion section from 1023 words down to 945 words. We reviewed this section carefully and think every sentences may be necessary. If you still consider it is too long for publication, please delet the second paragraph in this section started "Present case of liver carcinosarcoma has...", and then the word count will be 857. Please let me know if there is any other things I can do. Thank you for your suggestions.
