

Comments to Authors

NO. 1

“Low-level hospital” (in the abstract and page 6) may sound impolite or insulting for the people working hard in less-equipped, rural, or small sized hospitals. I would suggest the euphemism for that, such as “less prestigious” or “the hospitals where endoscopy training is not sufficient” or any.

Answer: I have revised this part in my manuscript.

NO. 2

Suuggestions:

1) The authors sholuld use other important technics for example: chromoendoscopy, Narrow-Band-Imaging (NBI), Magnified endoscopy and NBI+magnified endoscopy. If he use this technics, the results will change.

2) He should use this technics for good results.

3) At 1. reference, there is no year..

Answer:

1)and 2) I have revised this part in my manuscript .

3) I have revised the reference in my manuscript .
