ESPS Manuscript NO: 16152

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated.

2 Revision has been made according to the suggestions of the reviewer:

- (1) It has been specified that also patients with KRas mutation received the same treatment regimen of the wildtype.
- (2) It has been clarified that this was a retrospective study.
- (3) The presentation of the topic was clarified.
- (4) It has been specified that the sample was not randomized.
- (5) It has been specified that the treatment regimen was the same for each patient in study (DEBIRI + Cetuximab, DEBIRITUX), notwithstanding the type of first line treatment and the KRas status.
- (6) It has been clarified why the KRas status analysis was made retrospectively, because some centers did not perform the KRas status analysis before treatment beginning, for this reason it was made retrospectively in the central laboratory of the coordinating center of the study.

3 References and typesetting were corrected.

Thank you again for publishing our manuscript in the *World Journal of Gastrointestinal Oncology*.

Sincerely yours,
