World Journal Clinical Paediatrics

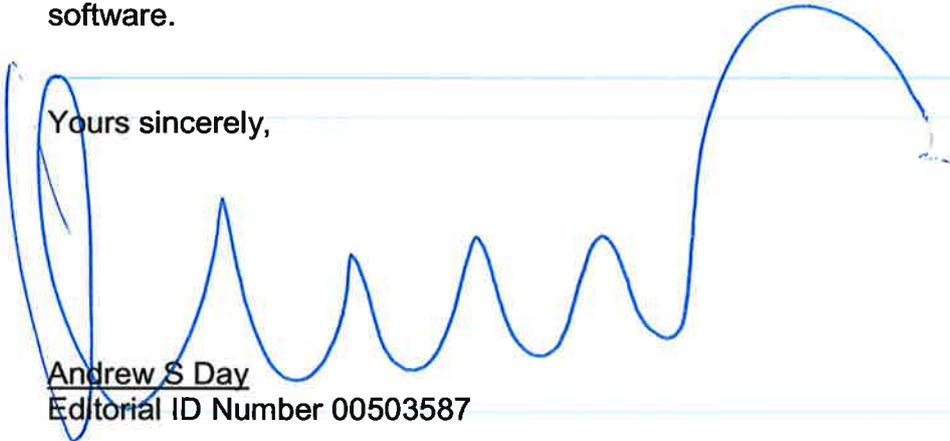

Dear Sir,

**Re: Manuscript # 1652, "Coeliac Disease in Children in Christchurch, New Zealand: presentation and patterns from 2000-2010"**

Further to recent correspondence, I write to confirm that the statistical analysis of the above manuscript was conducted following standard principles and guidelines we wish to submit the above titled manuscript for publication in the Journal.

Most of the analysis was descriptive. Comparative analyses involved one-way analysis of variance, *t* tests and chi-square tests utilising GraphPad InStat software.

Yours sincerely,

Andrew S Day
