

Format for ANSWERING REVIEWERS

March 26, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 16339-review.doc).

Title: Living donor liver transplantation with body-weight more or less than 10 kilograms

Authors: Sheng-Chun Yang , Chia-Jung Huang , Chao-Long Chen , Chih-I Isien Wang , Shao-Chun Wu
Tsung-Hsiao Shih , Sin-Ei Juang, Ying-Fu Lee, Bruno Jawan , Yu-Feng Cheng, Kwok-Wai Cheng

Name of Journal: *World Journal of Gastroenterology*

ESP's Manuscript NO: 16339

The manuscript has been improved according to the suggestions of the reviewers. The following general improvements have been made: 1) The format has been updated. 2) Again, revisions have been made according to the suggestions of the reviewer. Specifically, our responses to the numbered reviewer comments are as follows:

- (1) The etiologies of the G1 and GII patients have now been added in the results section. Please note however, that soluble vitamin deficiency was not routinely checked.
- (2) Yes, all the patients' PELD scores were derived from calculations.
- (3) More detailed information regarding fluids, blood transfusions, and previously published methods of documentation is now included in the methods section (please see references 9 and 10).
- (4) The data for Table 2 has been rechecked; the average platelet count for G1 was indeed higher than that for G2. That has now been corrected in the text.

Finally, the references and typesetting have also been corrected as necessary.

Thank you again for publishing our manuscript in the World Journal of Gastroenterology.

Sincerely yours,

Cheng Kwok Wai
