Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 16819-review.doc).

The manuscript has been improved according to the suggestions of reviewers:

- 1) Conflict of interest, data sharing statement and statistical analysis section have been added
- 2) Revision has been made according to the suggestions of the reviewers (see later)
- 3) References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

**REVIEWER 1**

*"This is an interesting review article presented by Baiocchi et al. which focuses on intraductal papillary mucinous neoplasms of the pancreas and their association with pancreatic and extrapancreatic malignancies. Overall the paper is quite educative, well organised and well written. I suggest to be published in its current form." Many thanks*

**REVIEWER 2**

*"The manuscript by Baiocchi et al critically reviewed the status quo of intraductal papillary mucinous neoplasms (IPMNs) of the pancreas and their association with pancreatic and extra-pancreatic malignancies in the available literature, and also discussed the consequences in IPMN management. Overall, it is comprehensive, to-the-point, and is likely to be highly cited. The discussion is also adequate". Many thanks. Indeed, this study took a lot of resources during the last 2 years.*

Many thanks for Your attention

Gian Luca Baiocchi, on behalf of all the Authors
