Dear Editors,

I am writing in regards to biostatistics for the manuscript titled "Pre-lung transplant measures of reflux on impedance are superior to pH testing alone in predicting early allograft injury" submitted by Wai-Kit Lo, Robert Burakoff, Hilary Goldberg, Natan Feldman, and myself. The statistical methods of this study were reviewed by all co-authors of the study. No other statistical assistance or review outside of the study authors was obtained.

Please let me know if you have further questions or inquiries. Thank you for your consideration and we look forward to hearing from you soon.

Sincerely,

Walter Chan
