

**Institutional review board statement**

**Dear Editor,**

My name is Simona Gurzu, I am Professor at University of Medicine and Pharmacy, Department of Pathology, Tirgu-Mures, Romania. My letter regards the paper "**Single skip metastasis in sentinel lymph node, in an early gastric cancer**" which was submitted for publication to your journal.

This is a case report in which surgical gastrectomy was performed using the currently guidelines, so institutional review board agreement was not necessary. Signed informed consent of the patient was obtained for publication.

Sincerely,

Simona Gurzu et al.
