

June 2, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 17848-Case Report.doc)

**Title:** Perforated Duodenal Ulcer: An Unusual Manifestation of Allergic Eosinophilic Gastroenteritis

**Authors:** Kevin M. Riggle, Ghassan Wahbeh, Elizabeth M. Williams, and Kimberly J. Riehle

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 17848

The manuscript has been improved according to the suggestions of the reviewer:

1. Format has been updated.
2. Abstract and core tip were added to the title page.
3. "Highlighted contents" were added at the end of the case report.
4. Question from reviewer 2542973: Did he have any previous Hx of NSAID administration prior to the episode of bowel perforation?
  - a. The patient did not have any history of NSAID use and the following sentence in paragraph 2 of the case report was revised as follows: He had no history of NSAID use, and was treated presumptively for *H. pylori*.

Thank you for considering our manuscript for publication.

Sincerely yours,

Kevin M. Riggle, M.D.
