List of Responses

Dear Prof. Ma and Reviewers:

Thank you for your letter and for the reviewers' comments concerning our manuscript entitled "A case report of Primary Splenic Angiosarcoma with Hepatic Metastases". (ESPS Manuscript NO: 17932) Those comments are all valuable and very helpful for revising and improve our paper. The responds to the reviewers' comments are as following:

Responds to Reviewer 02529197

1. Response to comment: The authors of the case report "Primary angiosarcoma of the spleen with hepatic metastases" present a problem of the early diagnosis of splenic angiosarcoma. In my opinion, the manuscript is correctly written.

Response: We would like to express our sincere thanks to you for the positive encouragement, but we have change the title (A case report of Primary Splenic Angiosarcoma with Hepatic Metastases) at the request of the editorial department.

Responds to Reviewer 00225294

1. Response to comment: One suggestion is to review the literature on this subject and to improve the quality of the analysis..

Response: We made the discussion according to the epidemiology, etiology, clinical presentation, risk factors of prognosis, image diagnosis and pathological diagnosis. We have added some treatment approach and more references in the revised manuscript which are highlighted in red.

2. Response to comment: The work by Despoina M, Dionysios D, Georgios A, Konstantinos S, Efstratios K, Adamantia ZS. Primary angiosarcoma of the spleen: an oncological enigma. Case Rep Oncol Med. 2014;2014:193036. doi: 10.1155/2014/193036. Epub 2014 Jul 2. PubMed PMID:25105042; PubMed Central PMCID: PMC4101939; should be cited and commented.

Response: We have cited it in the reference [8].

3. Response to comment: If samples of the tumor are available -biopsies- it would be interesting to show immunocytochemistry samples.

Response: We are very sorry for our negligence of the immunocytochemistry samples. We have add the images in the revised version.

We appreciate for editors' and reviewers' warm work earnestly, and hope that the correction will meet with approval. Once again, thank you very much for your comments and suggestions.
