

Editor-in-chief of WJG

Dear Editor-in-Chief:

I am enclosing herewith our manuscript entitled "**Anti-inflammatory therapy using herbal medicine and reduction of the risk of hepatocellular carcinoma development.**" for publication in your esteemed journal. I revised this manuscript as follows in green letters:

Reviewer(s)' Comments to Author:

Reviewer No. 503516

Comments to the Author

Yasushi Rino presented a review about the potential therapeutic value of herbal medicine for the reduction of HCC development. The review is clearly written. The authors properly point out that despite some evidences of the therapeutic potential of herbal medicine, no clear demonstration has been so far provided in this regard. I suggest to include a table with the different herbal medicine types and the published evidences of a possible positive effect for HCC

We add the Table 1.
