

ANSWERING REVIEWERS

May 21, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: Manuscript 18387-review.doc).

Title: Peliosis hepatis: personal experience and literature review

Authors: Daniele Crocetti, Andrea Palmieri, Giuseppe Pedullà, Vittorio Pasta, Valerio D'Orazi, Gian Luca Grazi

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 18387

The manuscript has been improved according to the suggestions of reviewers:

1. I added in the manuscript that the previous cholecystectomy was performed for gallbladder stones;
2. I described more detail in the text the pain pattern and clinical presentation before liver segmentectomy;
3. I have not presented venous and delay phases pictures of the dynamic CT because they were not significant from the clinical point of view as the lesion in the late phase was no longer evident;
4. I shifted parts of the background section in the discussion section because background section was too long.

Revision has been made according to the suggestions of the reviewer. References and typesetting were corrected and I confirm that all of the references are properly cited.

The changes and shifts of the text are highlighted in yellow in the revision of the manuscript.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Valerio D'Orazi'.
