

## **ANSWERING REVIEWERS**

This is a good, brief review about the fecal DNA testing for colorectal cancer screening. In the review, the molecular rational, techniques, current status and future perspectives of fecal DNA tests have been described and discussed. And I think this paper will make a useful contribution to the literature on this topic.

Minor revision: There is a spelling mistake in abstract: arman(m)etarium.

**In response to reviewers' comments, the spelling mistake "armanetarium" was corrected to "armamentarium".**

## **ANSWERING EDITOR**

**In response to the editor's comments:**

1. A short running title of less than 6 words was provided
2. Author contributions section was filled
3. Conflict of interest statement was added
4. Core tip was added
5. Audio Core Tip was added and is attached as separate file
