

October 2015

Ze-Mao Gong,  
Science Editor, Editorial Office

Dear Editor,

Enclosed please find our revised manuscript **ESPS Manuscript NO: 19027**  
**Non-pharmacological treatment of Helicobacter pylori by Haim Shmueli,**  
**Noam Domniz, Jacob Yahav.**

We have answered all reviewers' queries.

Main comments:

The Abstract should not contain references. Rather, the abstract would be more suitable as an Introduction, which is lacking in the manuscript.

**Answer: We have corrected the "Abstract" and add "Introduction".**

The latin names of plants should be italicized.

**Answer: All latin names used in the text have been italicized.**

The review is too much narrative. Authors should add some numerical data from the studies conducted on human beings.

**Answer: We have added some data from the studies conducted on human beings.**

Thank you.

Sincerely yours,

H. Shmueli, MD
