

**Conflict-of-interest statement**

Name of the manuscript: **THE ROLE OF LIVER RESECTION IN THE MANAGEMENT OF MULTINODULAR HEPATOCELLULAR CARCINOMA**

The authors whose names are listed immediately below certify that they have NO affiliations with or involvement in any organization or entity with any financial interest (such as honoraria; educational grants; participation in speakers' bureaus; membership, employment, consultancies, stock ownership, or other equity interest; and expert testimony or patent-licensing arrangements), or non-financial interest (such as personal or professional relationships, affiliations, knowledge or beliefs) in the subject matter or materials discussed in this manuscript.

**Author name: Osman Abbasoglu, July 4 2015**

**Commented [W用6]:** A conflict-of-interest statement is required for all article and study types. In the interest of transparency and helping reviewers to assess any potential bias in a study's design, interpretation of its results or presentation of its scientific/medical content, the BPG requires all authors of each paper to declare any conflicting interests (including but not limited to commercial, personal, political, intellectual, or religious interests) in the title page that are related to the work submitted for consideration of publication. In addition, reviewers are required to indicate any potential conflicting interests they might have related to any particular paper they are asked to review, and a copy of the signed statement should be provided to the BPG in the required format.
