Dear Dr. Yu,

I'm writing to you in regard to the revision of our manuscript entitled "Multipotent Mesenchymal Stromal Cell: a promising strategy to manage alcoholic liver disease" (N°19672), by Fernando Ezquer, Flavia Bruna, Sebastián Calligaris, Paulette Conget and myself.

We really appreciate the helpful comments of the reviewers and the opportunity to resubmit our review. We have addressed the specific concerns by a point-by-point analysis. Please, find below reviewer and editor comments **(c)**, our reply to them **(R)** and the modifications made in the resubmitted version of the review **(M)**.

We hope that the modifications introduced in our manuscript improve it and thus, fulfills the criteria to be published on World Journal of Gastroenterology.

Sincerely yours,

Dr. Marcelo Ezquer

Reviewer comments:

**C1.** The general quality of the review and the readability would be helped by adding in tables or bullet points of key messages such as: -list of potential beneficial effects of MSC son liver inflammation – list of potential effects of MSC son liver regeneration – table of animal models with encouraging outcomes and caveats for each study.

R1. We agree with the reviewer's suggestion

M1. Table 1: "**Proposed cellular and molecular mechanisms that could contribute to hepatic protection by MSCs in ALD**", and Table 2: "**Preclinical studies using MSCs or their derivatives to treat liver injury**", were added.
