**Name of Journal:** *World Journal of Radiology*

**ESPS Manuscript NO:** 19867

**Manuscript Type:** MINIREVIEWS

October 2, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name:19867-Revised manuscript).

**Title:** Diffusion weighted Imaging in Gynecological Malignancies- Present and Future

**Authors:** Dinesh Manoharan ,Chandan J Das, Ankita Aggarwal, Arun Kumar Gupta

**Name of Journal:** *World Journal of Radiology*

**ESPS Manuscript NO:** 19867

The manuscript has been improved according to the suggestions of reviewers:

11 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

Thank you for spending your valuable time in review our article, your comments were well taken and very useful to further improve our article. The following changes were made as advised;

- The title might be changed as the review described the importance of DWI in gynecological malignancies.

We realized that we haven't talked much about the past of DWI in our article, hence we have removed the same from the title and changed it to "Diffusion Weighted Imaging of Gynecological Malignancies- Present and Future". We feel the current title aptly describes the internal content of our article which is to describe DWI's present role and future applications in gynecological malignancies.

- The DWI protocol of MRI in pelvis should be mentioned in the form of a table.

The same has been done and a new heading “protocol” has been added along with Table 1.

- Sarcomas were discussed only in one sentence. They should be described more comprehensive in a separate title.

A separate heading along with appropriate references is added.

- PET and DWI might be compared as statistical in whole body screening for metastases. And the benefits of the DWI in the staging of endometrial ca might be described as statistically.

We have added a new heading on DWIBS and discussed its current role in detail with appropriate statistics.

The benefit of DWI in endometrial staging has been edited to include the relevant statistical data.

3 References and typesetting were corrected

Thank you again for accepting our manuscript in the *World Journal of Radiology*.

Sincerely yours,

**Dr Chandan J Das. MD,DNB,MNAMS**
