Manuscript Type: Minireviews

Answering reviewers

I appreciate the insightful comments you have made in regards to this article. I have made several changes in response.

1. Established guidelines for symptom management: I have used the NCCN (National comprehensive cancer network) guidelines and have cited these in the article.
2. Most of the side effects discussed are directly related to radiation therapy, although the chemotherapy used has a sensitizing effect. I did add specific mention of the platinum based agents as they tend to cause more difficulty with nausea. I also discuss how Cetuximab can increase certain toxicities.
3. I have eliminated the term "pre-habilitation from page 10
4. Pre-treatment symptoms discussed on line 24 are the tumor related symptoms that occur prior to beginning treatment
5. NP symptom on page 13 is Nurse Practitioner symptom management clinic. I have been more specific in writing this out.
6. I have written out the members of the multidisciplinary team in the article.

Thank- You
