To whom it may concern:

The study entitled "Pharmacogenetics and the Care of Child and Adolescent Patients" was reviewed and approved by the Mayo Clinic Institutional Review Board (IRB), 200 1<sup>st</sup> Street SW, Rochester, MN 55905.

Committee Name - (Project ID)	Expedited Review B - (07-003005)
Meeting Date	4/24/2007
Decision	Exempt
Agenda Type	New Protocol
Link to:	<a href="#">View/Print Study</a>
Letter to PI	The Committee reviewed for human studies the protocol entitled "Pharmacogenetics and the Care of Child and Adolescent Psychiatric Patients" from Dr. Christopher Alan Wall and colleagues. The Committee noted that the human studies aspects involve the use of existing data and determined it to be exempt under 45 CFR 46.101 (b) 4. The data must be recorded by the investigator in such a manner that subjects cannot be identified directly by looking at the data, or indirectly through identifiers linking the data to the subjects. Continuing or annual IRB review of this protocol is not required as the protocol is currently written. However, modifications to the study design or procedures should be submitted to the IRB, to determine whether the protocol continues to be exempt. 07-003005
Additional minutes	

Because this study is a chart review and the research is exempt, a waiver of informed consent was allowed. Study subjects have given authorization for use of their Mayo Clinic electronic medical record for research purposes.
