

Answer to Reviewer's comments

Q1. Nevertheless, interferon and ribavirin are still the first line drugs for HCV treatment in many countries. The cost of them should also be taken into consideration. Moreover, considering the long treatment periodicity of HCV, methods for improving patient's compliance are needed

A1. The paper is revised according the reviewer's suggestions. The cost of Interferon and Ribavirin therapy is added in the paper. The Sovaldi treatment response is linked with the adherence to the proper treatment regimen, details mentioned in paper. The paper is proof readied to remove any typing mistake.
