

Clinical trial registration waiver letter

Editorial Office,

World J Gastroenterology

June 11, 2015

Dear Editor:

The data of the manuscript entitled "The diameter of the common bile duct in the asymptomatic population: a MRI study" were analyzed anonymously. The methods and results of this study are for the purposes of research, there is no conflict of interest.

The experimental design and the program of the study will not cause harm and risk to the subjects. So we waived the clinical trial registration.

Sincerely yours,

Xiao-Ming Zhang, M.D.
