Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 2077-review.doc).

Title: Role of microRNAs in immune system, inflammation and cancer

Author: Jennifer Raisch, Arlette Darfeuille-Michaud, Hang Thi Thu Nguyen

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 2077

We would like to thank the reviewers and the editorial board for their expert review of our manuscript.

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

Reviewer 1: *This manuscript clearly and comprehensively summarizes and highlights recent findings in the role of miRNAs in the immune system and in inflammatory bowel disease as well as cancer. Minor issues: 1) In Table 1 it would be nicer to have the Ref numbers instead of the name and year so that they can be more promptly identified 2) The reference for the work summarized in Fig 1 should be added also to the Figure legend*

We would like to thank the reviewer for this suggestion. We have modified the manuscript accordingly.

Reviewer 2: *In this manuscript entitled "Role of microRNAs in immune system, inflammation and cancer" the authors summarized and discussed the current understanding for the role of microRNA. In particular, the authors focused on their role and mode of action in regulating immune system during inflammation and carcinogenesis. In overall, the manuscript is well organized and well written. Additionally, this review contains lots of useful and valuable information for readers.*

Thank you very much for your evaluation.

3 References and typesetting were corrected.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Hang Nguyen, Ph.D
