1. Format has been updated including references.
- 2 . Revision has been made according to the suggestions of the reviewer

**[Reviewer Comments]**

Reviewer #1:

1 some minor language problem should correct;  
→ We corrected it using the English editing services.

2 show molecular mechanism of HL-CCA by a picture;  
→ We added it with figure 3.

Reviewer #2:

1 the short-term results of surgical resection in patients with hepatolithiasis-associated cholangiocarcinoma should be addressed.

→ We mentioned the results of surgical resection in patients with hepatolithiasis-associated cholangiocarcinoma on *page 14, section of "Is the prognosis of HL-CCA worse than CCC alone?"*

2 the results of surgical resection in patients with hepatolithiasis is too simple.

→ We added the results of surgical resection in patients with hepatolithiasis on *page 10, section of "Management strategy for hepatolithiasis"*

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Hyo Jung Kim, MD, PhD
