

1. I have revised the statistical approach using Univariate and multivariate regression analysis.
2. I have revised the follow-up time as follow: The median follow up period was 23 months (range from 0 to 70 months). I took the advice of peer-reviewer.
3. The survival times has been expressed as median and 95% confidence intervals.
4. The reference has been prepared more carefully.
5. I did not cite "Facciorusso A, Antonino M, Del Prete V, Neve V, Scavo MP, Barone M. Are hematopoietic stem cells involved in hepatocarcinogenesis? *Hepatobiliary Surg Nutr.* 2014 Aug;3(4):199-206." because my Manuscript was finished before Aug 2014.
