## Certificate of Life Science Review

---

This document verifies that the ESPS Manuscript Number 2154, “Unexpected endoscopic full-thickness resection of a duodenal neuroendocrine tumor” has undergone a professional medical editing review in March of 2013. This review was performed by one or more board-certified editors (Board of Editors in the Life Sciences certification; [www.bels.org](http://www.bels.org)). Hoppenrath Enterprises has been providing high-quality medical editing and writing services for physicians, pharmaceutical companies, and international scientific journals for nearly 30 years. This document confirms that the article referenced was carefully reviewed through a rigorous multistage technical editing process, but only verifies the editing of the article at the time it was returned to the authors.
