ESPS Manuscript NO: 21821

Manuscript Type: REVIEW

Reviewed by 00058381

Major Comment: This is an interesting review on an important subject. It should be underlined by radiological images (before and after the first procedure) and by intraoperative pictures. Minor Comments: 2.4.4 Improvement of patient safety by imaging study and liver function test, second paragraph: "iminodiaceticacid" > iminodiacetic acid. 2.4.4 Improvement of patient safety by imaging study and liver function test, third paragraph (last sentence): "woulded" > would

Response: We thank the reviewer for the suggestion and revised our manuscript accordingly. We added six figures to the new version of the manuscript.

Reviewed by 00053659

Li et al. reviewed associating liver partition and portal vein ligation for staged hepatectomy (ALPPS) from technical aspect and oncological discussion. The manuscript is well written, but no figs and no tables are unacceptable. Please add some figs and tables to support your writings.

Response: We thank the reviewer for the suggestion and revised our manuscript accordingly. We added six figures and one table (summary the most important cohorts published since 2012) to the new version of the manuscript.
