

Format for ANSWERING REVIEWERS

August 25, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 22050-review.doc).

Title: Skeletal muscle as a therapeutic target for delaying type 1 diabetic complications

Name of Journal: *World Journal of Diabetes*

The editor of the paper suggested changes with regard to referencing. Square superscript brackets were added to in-text references and reformatting applied to the reference section such that PMID and DOI were added to each reference. While one reviewer had no comments, the second suggested including data regarding changes to muscle size in persons with T1DM. This was addressed more specifically in the second opening paragraph.
