Dear Editor:

I have contacted every author in our manuscript entitled "The mechanisms of IL-22's beneficial effects in acute pancreatitis", and have been informed that none of them has any conflict-of-interests to declare. Thus we have no conflict-of-interest to report in this manuscript submitted to World Journal of Gastrointestinal Pathophysiology.

If you have any questions or need more information regarding this conflict-of-interest statement, please feel free to contact me.

Sincerely yours,

A handwritten signature in cursive script that reads "Chongmin Huan".
