### COMMENTS TO AUTHORS

The manuscript by Drummond and Wingert summarized the molecular mechanism for the renal cell regeneration that were obtained by the study using Zebrafish. The manuscript is very educational and well organized. The study obtained by the Zebrafish will be translatable to the human kidney regeneration.

#### Author's response to reviewer 01021289:

*We thank the reviewer for the evaluation of our manuscript. The manuscript has been revised throughout to improve language and perform minor language polishing.*

### COMMENTS TO AUTHORS

This is very well written and organized review in the field of stem cell and Zebrafish kidney regeneration field. This review is covering not only all recent and relevant literatures but also proving novel insights in this field and how it is translated to understand renal regeneration in human. I would highly recommend this manuscript for publication in World Journal of Stem Cells.
