Journal:

*World Journal of Respiriology*

Dear Editor,

Re: Revisions for Manuscript: Review 22482

We thank you and the reviewers for your interest in and insightful comments about our manuscript entitled, *Lung Cancer Screening: Should We Be Excluding People with Previous Malignancy?* We address their comments below.

1. Reviewer 00608185 commented, "This manuscript was well organized and interesting." We appreciate this input. We have kept the overall structure and content intact.
2. Reviewer 00504024 commented, "This manuscript is well organized in terms of lung cancer and previous cancer study. It also poses some concern and problems in lung cancer screening." We appreciate these comments.
3. Reviewer 0061154 commented, "Because the manuscript is so long I suggest that you use tables, especially for the 15 open studies, as well as other areas where many references are cited." We agree that the studies are challenging to evaluate in the body of the manuscript. We have added two tables to clarify and summarize the pertinent studies.

We have revised our manuscript with the requested changes, including the changes noted on the editor's updated version.

We thank you and the reviewers again for the helpful comments about our manuscript and your interest in our work. We look forward to hearing from you favorably.

Sincerely,

Cherie P. Erkmen, M.D.
