

Dear Ms. Fang-Fang Ji,

Greeting from Phoebe of BMS Publication team. I reply you on behalf of corresponding author Prof. Wei.

Enclosed pls find the revised paper. We revised it according to your comments. As for the audio core tip, the MP3 file is also attached for you and the content could be found in the paper.

But as for grant number, we haven't it. This study is a survey not a clinical trial, which is financially supported by my company Bristol-Myers Squibb. It is the company internal budget. As far as I know, if the financial support is from a foundation or national program, there would be a grant number and grant approval. However, this study isn't.

We look forward to your understanding. And please believe that we have tried our best to prepare all the documents that the journal requires. You could call me for any details. And if smoothly, could we move to the next step of publication? Thank you very much!

Any further comments, please feel free to let us know.
Once again, thank you!
