Re: Manuscript 24003 "Sieving Characteristics of Cytokine- and Peroxide-Induced Epithelial Barrier Leak: Inhibition By Berberine"

Dear Editor:

This letter is to certify that neither human nor animal subjects were used in the research in this manuscript. Concerning statistical interpretation of data, all data are reported as mean + standard error of the mean, with differences between/among means evaluated by either two-sided Student's t tests or ANOVA.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. M. Mullin".

James M. Mullin, Ph.D.  
Professor  
Lankenau Institute for Medical Research
