

ANSWERING REVIEWER ( reviewer code 00057100)

We thank you for the positive evaluation of our manuscript. Describing "...how we measure quality of life" = this is now more detailed and better described in METHODS (see first-half of page 8). The life quality was measured by a scale of 4 index points describing: good (1 point), acceptable (2 points), impaired (3 points) and not acceptable (4 points).
