

Milan, January 20th 2016

Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 00730771

Manuscript Type: Basic Study

Epithelial-to-mesenchymal transition in pancreatic ductal adenocarcinoma: characterization in a 3D-cell culture model

Nicoletta Gagliano, Giuseppe Celesti, Lorenza Tacchini, Stefano Pluchino, Chiarella Sforza, Marco Rasile, Vincenza Valerio, Luigi Laghi, Vincenzo Conte, Patrizia Procacci

CONFLICT OF INTEREST

Herewith I declare that there are no known conflicts of interest associated with this publication and there has been no significant financial support for this work that could have influenced its outcome.

Prof. Nicoletta Gagliano

Herewith I declare that there are no known conflicts of interest associated with this publication and there has been no significant financial support for this work that could have influenced its outcome.

Prof. Lorenza Tacchini

Herewith I declare that there are no known conflicts of interest associated with this publication and there has been no significant financial support for this work that could have influenced its outcome.

Dr. Vincenza Valerio

UNIVERSITÀ DEGLI STUDI DI MILANO
FACOLTÀ DI MEDICINA E CHIRURGIA

Herewith I declare that there are no known conflicts of interest associated with this publication and there has been no significant financial support for this work that could have influenced its outcome.

Dr. Giuseppe Celesti

Herewith I declare that there are no known conflicts of interest associated with this publication and there has been no significant financial support for this work that could have influenced its outcome.

Dr. Marco Rasile

Herewith I declare that there are no known conflicts of interest associated with this publication and there has been no significant financial support for this work that could have influenced its outcome.

Dr. Luigi Laghi

Herewith I declare that there are no known conflicts of interest associated with this publication and there has been no significant financial support for this work that could have influenced its outcome.

Prof. Chiarella Sforza
