

Non Human Subject Research Determination Request

Ajita Prabhu,

The Center for Clinical Research and Technology has reviewed the Activity Determination Form (DET) on 12/05/2015 for the project entitled "Gallstone Ileus with Impaction at Meckel's diverticulum: Case report and Literature Review" (IRB# NHR-15-93) and has determined that this project does not qualify as "human subject research" according to Federal regulations. According to the review, the current project is not a systematic investigation designed to contribute to generalizable knowledge under 45 CFR46 or 21 CFR 56.

This activity is also considered HIPAA Waived.

If the scope of the project changes or once you have a plan to engage in "human subject research", please be sure to contact the Center for Clinical Research and Technology for a new determination.

Thank you for your submission. Please retain this as proof of review.
