

Dear Editor,

I would like to thank you and the reviewers for reading our manuscript and reviewing it. I am very happy to resubmit for publication the revised manuscript of “Epidemiology of Hepatitis C in Greece”. Following your suggestions, this document was prepared and it will be submitted with the additional necessary documents.

The format of the manuscript has been updated according to the guidelines for the Topic Highlight form. We will attach the core tip in an audio form (mp3) and the Google Scholar search. For the Google Scholar search we will attach a document with the first page of the results where you can find the link with the additional pages as there are numerous pages of related documents. As far as the foundation is concerned, there are no grants to declare and as far as the language we are native English speakers. The copy right assignment will be attached in the resubmission with the revised manuscript as well as all the related documents.

Yours sincerely

C. Triantos, MD
